

smoothie powder

What is it: the highlight of your day as breakfast or after a good workout or walk. Fruity, healthy and delicious when freshly sipped? Of course, only after you've washed, peeled, cored, sliced and chopped all those delicious fruits and vegetables. The smoothie! Yes! Just don't go to all that trouble..... Is it possible?

The solution is dried fruit and vegetable powder!

Now there's no need for an extra half hour of prep to get a good smoothie or fresh juice. The smoothie powder produced by MPM Research Ltd. combines the trio of health, pleasure and simplicity. The gentle, low-temperature vacuum drying technology preserves the nutritional value and flavour of the fruits used. It is available in a very easy-to-use form, in any situation. You can create a range of exciting foods and drinks up to your imagination.

What do fruits and vegetables give us?

Fruits and vegetables mean life for several creatures. Without the nutrients, vitamins and fibre they contain the human body would not be able to function healthily. Today's health conscious people are well aware of this, which is why they try to get most of their daily nutrient intake from fruits and vegetables.

However, fast paced life and particular life situations do not always allow this need to be met. And although we can now obtain special fruits in winter, the fruits that are picked green and ripened contain less nutritional value.

What can we get from smoothie powder?

Vacuum-dried, ground fruits and vegetables are processed while still ripe to provide natural, satisfying nutrition in the most extreme situations. They have high quality, real flavour and unaltered, organic ingredients.

The smoothie powder can be soaked in water to obtain a juicy vegetable and fruit juice, but it is also perfect as an ingredient for smoothies and shakes.

vegetarian

rich in vitamins

no artificial
additives

no added sugar
